

Installing Norton Racing Ram Air Kit for Kawasaki Ninja 400

1. Remove radiator and cut/break off radiator mounting tab.

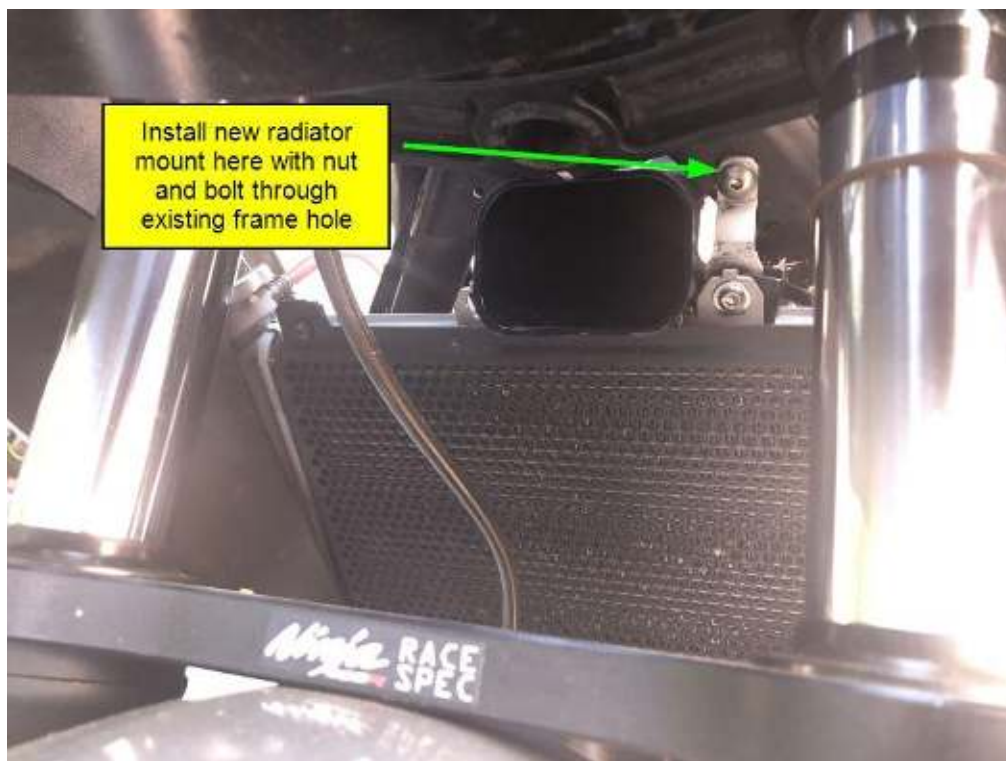

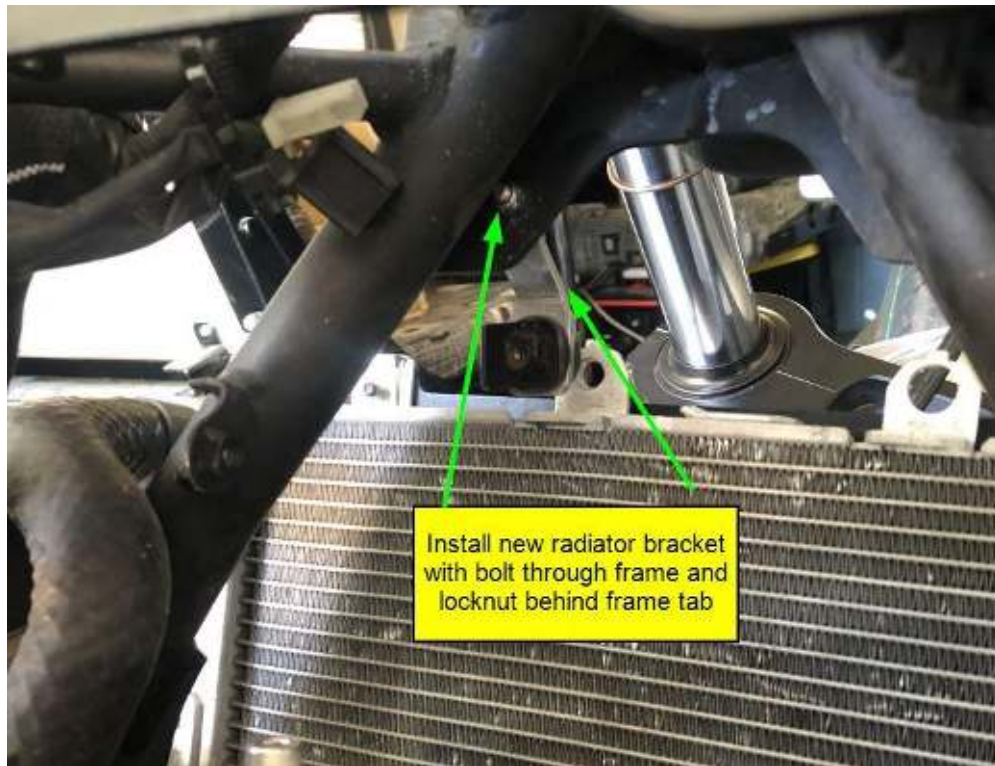

2. Remove frame tab.

3. Install radiator mounting tab in OEM frame hole with nylon locking nut behind frame.

4. Cut out airbox using ram air template.

5. Install plugs into OEM airbox inlet holes.

6. Install airbox w/ Ram Air into motorcycle and attach to throttle bodies.

7. Mount radiator to new mounting bracket. Radiator will capture Ram Air inlet between radiator and frame to hold it in place.
